

ARTIRUNDUM®

SFR, SFRG, SFR-M2, SFRG-M2

ARTIRUNDUM® SFR and SFRG are semi-friable brown fused alumina. They are undergone precision fusing for special crystallization and low titanium content. The grains are specially engineered for uniform particle shape with sharp cutting edges.

ARTIRUNDUM® SFR and SFRG are specially used in making different types of grinding wheels for working on heat sensitive conditions while high speed cutting is required.

ARTIRUNDUM® SFR-M2 and SFRG-M2 are further treated with ceramic coating to increase the adhesive action where special grinding wheels with stronger bonds are required.
